Strengths and Improvement Areas

Environment

Weight ●●●●

Strengths (50)

Policies

Strengths

Quantitative objectives set on energy consumption & GHGs

Environmental policy on customer health & safety

Environmental policy on materials, chemicals & waste

Environmental policy on water

Environmental policy on energy consumption & GHGs

Comprehensive policy on a majority of environmental issues

Endorsement of external initiative on environmental issues [i.e. member of the World Business Council for Sustainable Development, CEO Climate Dialogue]

Endorsement of the Responsible Care Global Charter

Endorsement of the United Nations Global Compact (UNGC)

Actions

Strengths

Purchase and/or generation of renewable energy

Company-specific emergency preparedness and response procedure regarding local pollution

Company-specific emergency preparedness and response procedure regarding customer health and safety

Measures to ensure enclosure of emission sources and airtightness of equipment.

Measures to detect and/or eliminate accidental water contamination (e.g. groundwater, surface water)

Improvement of energy efficiency through technology or equipment upgrades

RCMS (Responsible Care Management System) certified

Provision of Safety Data Sheets (SDS)

Registration of substances to the ECHA

Formalized process in place to assess and document risks related to customer health and safety

Internal chemical classification and labeling system with reference to Global Harmonized System (GHS) and/or references to regional classifications

Formalized process in place to assess and document environmental risks

Company's checklists with safety requirements to support loading and unloading operations

Employee awareness or training program on transportation of hazardous materials

Internal chemical classification and labeling system with reference to Global Harmonized System (GHS)

On-site wastewater treatment unit

Use of waste heat recovery system(s) or combined heat and power unit(s)

Measures to treat waste gas or reduce air pollutants emissions

Infrastructure implemented to reuse water from operational processes (e.g. recover water from evaporation operation)

Recovery / abatement of NO_x

Company-specific research on potential health impacts of products/services

Provision of safety data sheets (SDS) adapted for the REACH regulation

Measures to reduce the sludge coming from the wastewater treatment

Regular soil testing for heavy metal contamination

Measures to reuse or recycle waste

Measures to reduce pollutants discharged to water

ISO 14001 certified (at least one operational site)

Recall procedure in place

Company awareness program for customers on health & safety issues associated with products/services

Results

Strengths

Sustainability report has been prepared in accordance with GRI Standards [i.e. Core Option]

Reporting on total water consumption

Reporting on total weight of non-hazardous waste

Reporting on total weight of hazardous waste

Materiality analysis in sustainability reporting

External assurance of sustainability reporting

Company communicates progress towards the Sustainable Development Goals (SDGs)

Reporting on scope 2 GHG emissions

Reporting on scope 1 GHG emissions

Company reports to CDP

Reporting on total energy consumption

Comprehensive reporting on environmental issues

Improvement Areas (5)

Policies

Priority Improvement Areas

Medium

Inconclusive documentation for policies on local & accidental pollution

Actions

Priority Improvement Areas

Low

Declares a percentage of sites ISO 14001 certified, but certificates or evidence provided are inconclusive

Results

Priority Improvement Areas

Medium

The 360° Watch has identified at least one significant controversy, fine or penalty regarding environmental issues in the last five years (see news with red downward arrow in the 360° Watch section).

Medium

The 360° Watch has identified at least one significant adverse report regarding local and/or accidental pollution.

Medium

The 360° Watch has identified at least one significant adverse report regarding materials, chemicals and/or waste.

Labor & Human Rights

Weight ●●●●

Strengths (52)

Policies

Strengths

Quantitative objectives set on employee health & safety

Labor & human rights policy on diversity, equity & inclusion

Labor & human rights policy on child labor, forced labor & human trafficking

Labor & human rights policy on career management & training

Labor & human rights policy on social dialogue

Labor & human rights policy on employee health & safety

Comprehensive policy on a majority of labor or human rights issues

Standard policy on a majority of labor or human rights issues

Health and safety policy also covers subcontractors working on the company premises

Endorsement of the Responsible Care Global Charter

Endorsement of the United Nations Global Compact (UNGC)

Actions

Strengths

Measures to promote gender and/or minority inclusion in the workplace

Collective agreement in place
Compensation for extra or atypical working hours
Additional leave beyond standard vacation days
Employee stock ownership plan (not restricted to executive level)
Employee satisfaction survey
Childcare services or allowance
Bonus scheme related to company performance
Flexible organization of work (eg. remote work, flexi-time)
Health care coverage of employees in place
Awareness training on child labor, forced labor and human trafficking
RCMS (Responsible Care Management System) certified
Actions to promote wage equality in the workplace
Awareness training regarding diversity, discrimination, and/or harassment
Formalized process in place to assess and document risks related to employee health and safety
Active measures for the prevention of musculoskeletal disorders
Emergency preparedness plan to all impacted employees (e.g. fire drills)
Internal audits on health & safety issues
Specific measures on discrimination issues
Provision of protective equipment to all impacted employees
Employee health & safety detailed risk assessment
Transparent recruitment process communicated clearly and formally to all candidates
Regular assessment (at least once a year) of individual performance
Active preventive measures for stress and noise
Health & safety procedures translated in major languages spoken by employees
Mandatory health check-up for employees
Active preventive measures for noise exposure
Provision of skills development training
Joint labor management health & safety committee in operation

Actions to promote the inclusion of employees with disabilities

Setting of individual career plan for all employees

European Works Council in place

Training of relevant employees on health & safety risks and best working practices

Results

Strengths

Sustainability report has been prepared in accordance with GRI Standards [i.e. Core Option]

Reporting on average training hours per employee

Materiality analysis in sustainability reporting

External assurance of sustainability reporting

Company communicates progress towards the Sustainable Development Goals (SDGs)

Reporting on the percentage of women in top executive positions

Reporting on accident severity rate

Reporting on accident frequency rate

Improvement Areas (5)

Policies

Priority Improvement Areas

Medium

Inconclusive documentation for policies on working conditions

Actions

Priority Improvement Areas

High

Supporting documentation demonstrates a low level of coverage of labor and human rights actions throughout the company operations/workforce

Results

Priority Improvement Areas

High

Reporting available on labor and human rights issues, but some material topics are not covered

Medium

The 360° Watch has identified at least one significant controversy, fine or penalty regarding labor and human rights issues in the last five years (see news with red downward arrow in the 360° Watch section).

Medium

The 360° Watch has identified at least one significant adverse report regarding employee health & safety.

Ethics

Weight ●●●●

Strengths (22)

Policies

Strengths

Policy on fraud

Policy on conflict of interest

Disciplinary sanctions to deal with policy violations

Employee signature acknowledgement of ethics policies

Policy on information security

Policies on corruption

Exceptional policy on ethics issues

Policy on anticompetitive practices

Dedicated responsibility for ethics issues

Endorsement of external initiative on ethics issues [i.e. member of the World Economic Forum (WEF) Partnering Against Corruption Initiative]

Endorsement of the United Nations Global Compact (UNGC)

Actions

Strengths

RCMS (Responsible Care Management System) certified

Whistleblower procedure to report ethics issues

Awareness training on ethics issues

Implementation of a records retention schedule

Measures for gaining stakeholder consent regarding the processing, sharing and retention of confidential information

Audits of control procedures to prevent corruption

Specific approval procedure for sensitive transactions (e.g. gifts, travel)

Results

Strengths

Sustainability report has been prepared in accordance with GRI Standards [i.e. Core Option]

Materiality analysis in sustainability reporting

External assurance of sustainability reporting

Company communicates progress towards the Sustainable Development Goals (SDGs)

Improvement Areas (6)

Actions

Priority Improvement Areas

High

Supporting documentation demonstrates a low level of coverage of ethics actions throughout the company operations

High

No supporting documentation regarding an ethics due diligence program on third parties

Low

No conclusive documentation regarding corruption risk assessments

Results

Priority Improvement Areas

High

No information on reporting on ethics issues

Medium

The 360° Watch has identified at least one significant controversy, fine or penalty regarding ethics issues in the last ten years (see news with red downward arrow in the 360° Watch section).

Medium

The 360° Watch has identified at least one significant adverse report regarding anti-competitive practices.

Sustainable Procurement

Weight ●●●●

Strengths (15)

Policies

Strengths

Standard policies on sustainable procurement issues

Endorsement of external initiative on sustainable procurement issues [i.e. member of Together for Sustainability (TfS)]

Policy on conflict minerals issues

Actions

Strengths

Supplier sustainability code of conduct in place

Investigation or traceability system of the supply chain (smelters, trades, mines) on conflict minerals due diligence (e.g. third party on site audit in place)

Capacity building of suppliers on environmental or social issues (e.g. corrective actions, training)

On-site audits of suppliers on environmental or social issues

Regular supplier assessment (e.g. questionnaire) on environmental or social practices

Training of buyers on social and environmental issues within the supply chain

Integration of social or environmental clauses into supplier contracts

Sustainability risk analysis (i.e. prior to supplier assessments or audits)

Results

Strengths

Sustainability report has been prepared in accordance with GRI Standards [i.e. Core Option]

Materiality analysis in sustainability reporting

External assurance of sustainability reporting

Company communicates progress towards the Sustainable Development Goals (SDGs)

Improvement Areas (7)

Actions

Priority Improvement Areas

High

No supporting documentation on the coverage of sustainable procurement actions throughout the company supplier base/operations

Low

Declares conducting a formal assessment of suppliers' progress with regards to REACH requirements, but no supporting documentation available

Low

Declares a percentage of suppliers for which conflict minerals information is available (e.g. CMRT) but no supporting documentation

Low

No information regarding if performing suppliers on environmental and social issues have access to unique incentives (e.g. supplier awards, preferred supplier program, access to RFPs)

Low

No information on whether sustainable procurement objectives are integrated into buyer performance reviews

Results

Priority Improvement Areas

High

Declares reporting on sustainable procurement, but no supporting documentation available

Low

Declares having a due diligence report on conflict minerals, but no supporting documentation available

Charleston airport authority sues 3M, Dupont, others over toxic fire fighting foam

https://www.postandcourier.com/environment/charleston-airport-authority-sues-3m-dupont-others-over-toxic-fire-fighting-foam/article_e7e89f32-6e6f-11ec-93d5-3f5d52ab20c8.html

The Charleston County Aviation Authority, the group that runs Charleston International Airport, is suing a slew of corporate defendants over a firefighting foam that was the standard for airports for years — and that research increasingly shows is dangerous to humans. Among the defendants are the companies 3M, DuPont de Nemours and Chemours.

Justice Department, EPA and Texas Settle with DuPont and PMNA and Require Action to Address Violations of Waste, Water and Air Environmental Laws at Texas Facility

<https://www.justice.gov/opa/pr/justice-department-epa-and-texas-settle-dupont-and-pmna-and-require-action-address-violations>

The U.S. Department of Justice, the Eastern District of Texas, the U.S. Environmental Protection Agency (EPA) and the Texas Commission on Environmental Quality (TCEQ) announced a settlement with E.I. Du Pont de Nemours and Company (DuPont) and Performance Materials NA, Inc. (PMNA) to resolve alleged violations of hazardous waste, air and water environmental laws at the PMNA Sabine River chemical manufacturing facility in Orange, Texas. Under this settlement agreement, DuPont and PMNA will conduct compliance audits, control benzene emissions and perform other injunctive relief to address violations at the facility. Defendants will also pay a \$3.1 million civil penalty and attorney's fees to the State of Texas.

Cumberland County Considering Legal Action Against Chemical Company For Water Contamination

<http://www.wunc.org/environment/2021-06-09/cumberland-county-legal-action-chemical-water-contamination-genx-chemours>

The Cumberland County Board of Commissioners is hiring an outside law firm as they consider legal action against Chemours. Chemours is an American chemical company that was founded in July 2015 as a spin-off from DuPont. The state of North Carolina sued DuPont and Chemours in 2020, accusing the firms of knowing the dangers of per- and polyfluoroalkyl substances, or PFAS, that were produced at a factory in Bladen County.

U.S. EPA Final Order With Penalty against E I DUPONT DE NEMOURS - LA PORTE PLANT, TX, facility

<http://echo.epa.gov/enforcement-case-report?id=06-2010-1100>

The proposed Consent Decree resolves Resource Conservation and Recovery Act (RCRA) violations concerning the identification, treatment, storage and disposal of hazardous waste, non-compliance with the Clean Water Act (CWA) requirements to implement secondary containment for oil-containing transformers and Clean Air Act (CAA) violations of the National Emission Standards for Organic Hazardous Air Pollutants for Pesticide Active Ingredients Production. The bulk of the violations stemmed from the company's chemical manufacturing operations and affected some of the wastewater treatment units. However, DuPont ceased chemical manufacturing operations at La Porte in 2014 and currently only operates the wastewater treatment system for tenant operators. Under the proposed settlement, DuPont has agreed to pay a state/local penalty of \$1,710,000 and a total compliance cost of \$138,000.

U.S. EPA Final Order With Penalty against FILMTEC CORPORATION, MN, facility

<http://echo.epa.gov/enforcement-case-report?id=05-2016-5054>

EPA and FilmTec have reached a settlement agreement to resolve alleged violations of the Clean Air Act at FilmTec's water filter manufacturing plant in Edina, MN. The terms include injunctive relief and a cash penalty of \$250,000. FilmTec owns and operates a campus in Edina, Minnesota, for the manufacture of water filtration products, primarily reverse-osmosis filters for domestic and commercial use. The facility operates under a Title V Permit with a facility-wide emission limit for volatile organic compounds (VOC) of 235 tons per year (tpy), making it a synthetic minor source under the program for the Prevention of Significant Deterioration of Air Quality (PSD). EPA alleges that FilmTec violated provisions of its Title V Permit by exceeding its facility-wide VOC limit and that FilmTec violated provisions of the PSD program by commencing constructing of a major modification to a major stationary source without first obtaining a PSD permit. In addition, EPA alleges that FilmTec did not use the method required by its Title V Permit to show continuous compliance with emissions limits for VOCs and Hazardous Air Pollutants (HAPs). These violations caused excess emissions of VOC, which contributes to ground level ozone. Ground level ozone irritates the human respiratory system and reduces lung function. Under the agreement, Filmtec will: (1) move production from uncontrolled Lines 200 and 300 to the newer, and well-controlled line 600, followed by decommissioning of lines 200 and 300, with no reduction or restriction on production; (2) perform comprehensive emission testing at all 29 emission points from the main process lines in order to accurately measure emissions; and (3) request permit modifications to accurately characterize emissions from all emission points going forward. Properly quantifying emissions is an existing regulatory requirement. FilmTec will pay a civil penalty of \$250,000.
