

DuPont™ Performance Building Solutions and Corian® Design 2030 Sustainability Goals

Grounded in science, we're working alongside those who also seek a sustainable tomorrow to help people thrive at home and in their communities for years to come.

The largest sustainability challenges can't be solved without big contributions from the building and construction industry. Solving these problems calls for sweeping transformation in today's building practices.

At DuPont Performance Building Solutions and Corian® Design, we're up to the challenge, and have charted a course to help make sustainability a reality in the building industry over the next decade. Inspired by the United Nations' Sustainable Development Goals (UN SDGs), and in support of the DuPont 2030 Sustainability Goals, we are committed to deliver solutions that help solve climate change, drive the circular economy, deliver safer solutions, and help communities thrive.

Delivering Solutions for Global Challenges

We believe that long term shared value is created by solving the challenges defined in the SDGs.

2030 Goal:

100 percent of our innovation portfolio will meaningfully advance the UN SDGs and create value for our customers

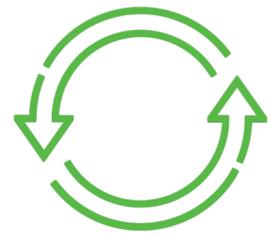

Acting on Climate

We believe that all buildings play a critical role in helping mitigate and adapt to climate change – a real and rapidly growing threat to the planet.

2030 Goal:

We will reduce greenhouse gas (GHG) emissions from DuPont™ Performance Building Solutions and Corian® Design operations by 75% from 2019 levels.

Enabling the Circular Economy

We believe that a sustainable building industry is a circular building industry, where no materials are wasted and all materials are reused.

2030 Goal:

We will advance the circular economy in the building industry through innovation in materials and business models, collaboration, and end-of-life plans that eliminate and upcycle waste across the product life cycle.

Innovating Safer by Design

We believe that all chemistry in the building industry should aspire to be green chemistry.

2030 Goal:

We will collaborate with our customers and key partners to bring green chemistry innovations to market and will drive continued reduction in the presence of priority substances in our portfolio.

Building Thriving Communities

We believe that every person on the planet should have the opportunity to live in safe, affordable, and resilient structures.

2030 Goal:

We will work to build communities, strengthen families, and empower the next generation across the globe.
