

*The miracles of science™*

## **EVEN MORE POWER AGAINST TROUBLESOME WEEDS.**

**DuPont™  
Guardian® Plus II**  
pre-emergent herbicide

**Now there's an even more powerful way to get your soybeans off to a clean, weed-free start.**

**DuPont™ Guardian® Plus II** is a broad-spectrum herbicide that can be applied from burndown through to early pre-emergence in IP and GT soybeans. It can be used as a pre-plant burndown up to 30 days before planting or pre-emergence up to 3 days after planting. **Guardian® Plus II** could be the only soybean herbicide you need this season!

### **Guardian® Plus II offers:**

- A new mode of action to combat weed resistance
- Enhanced residual control of troublesome weeds like Eastern black nightshade, and herbicide-resistant (Group 2 and triazine) pigweeds and lamb's-quarters
- Best overall burndown for IP and GT soybeans
- Suppression of annual grasses like green foxtail
- Reduced early season weed competition

### **Three powerful active ingredients**

The active ingredients in **Guardian® Plus II** are chlorimuron-ethyl (CE), flumioxazine and glyphosate. They belong to 3 different herbicide groups (groups 2, 9 and 14) providing you with multiple modes of action to combat weed resistance.

Combined, they deliver a powerful level of weed control in soybeans:

- CE delivers knock-down and residual control of annual and perennial broadleaf weeds, in addition to suppression of annual grasses and volunteer corn.
- Flumioxazin provides residual control of Eastern black nightshade and other broadleaf weeds, as well as suppression of some grasses.
- The third active ingredient, glyphosate is the foundation of any burndown treatment.

## Provides even more powerful weed control than DuPont™ Guardian® herbicide

### Weeds controlled with DuPont™ Guardian® include:

- Annual sow-thistle
- Prickly lettuce
- Velvetleaf
- Dandelion
- Ragweed
- Yellow nutsedge (suppression)
- Lamb's-quarters (including triazine-resistant types)
- Redroot pigweed (including triazine-resistant types)
- Volunteer Adzuki beans (suppression)
- Wild carrot (suppression)

### Guardian® Plus II adds control of these troublesome weeds:

- Eastern black nightshade
- Green pigweed (including triazine-resistant types)
- Improved control of common ragweed
- Hairy nightshade
- Redroot pigweed (including Group 2-resistant types)
- Green foxtail (suppression)

## Available in two convenient pre-measured packages

**Guardian® Plus II** is available in a case designed to treat 10 acres. For larger soybean acreages, a 400 L MEGA™ tote treats 400 acres.

### Excellent Residual Control
