

The miracles of science™

SPEED, AGILITY AND EXCEPTIONAL COVERAGE

DuPont™
Acapela®
fungicide

Protect your canola against disease.

Sclerotinia can drastically reduce yields, so you need a high performing fungicide you can rely on. Acapela® provides more complete coverage and protection because it is rapidly absorbed and moves quickly into and within each plant. Acapela® is best applied at the 20–50% bloom stage.

With 4 movement properties, Acapela® is a one-of-a-kind fungicide that quickly and efficiently surrounds, penetrates and protects the leaf and stem.

This characteristic provides superior disease control for greener, healthier crops and higher yield potential.

Translaminar Movement

Moves through the leaf surface to protect top and bottom sides of the leaf.

Local Gas Activity

Gas-like protective barrier that moves locally over the leaf surface.

Xylem Systemic Activity

Movement through the plant tissues to distribute throughout the leaf.

Wax Diffusion

Provides more consistent coverage across the leaf or stem surface.

Rapid Absorption: Acapela® is also rapidly absorbed, putting these 4 unique movement properties to work fast, and allows you to spray when field conditions are challenging.

Translaminar Movement

Xylem Systemic Activity

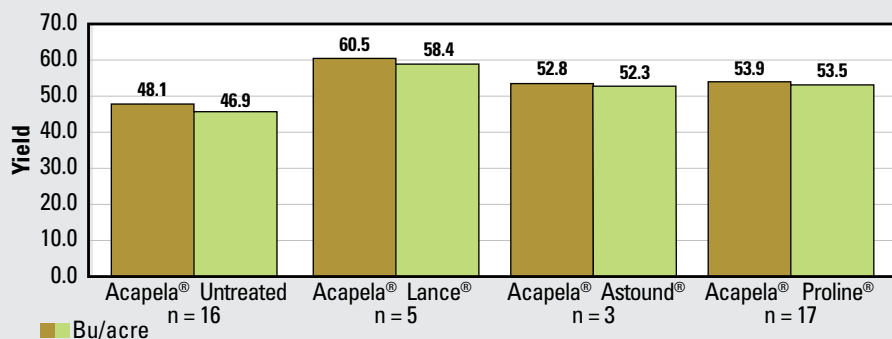

Local Gas Activity

Wax Diffusion Activity

More moves, more bushels

Acapela® Field Performance – Canola

Source: 2012-2015 DuPont Side-by-Side Trials

- Grower run field scale trials show consistent and excellent results against key competitors.
- Improved harvestability, standability and plant health.

Acapela® Fungicide – Yield Results:

Untreated
= 37 bu/ac

DuPont™ Acapela®
= 45 bu/ac

Source: Westlock, AB 2013

Crops	Diseases	Rates	Application Information
Canola	Sclerotinia rot – white mould	0.323 L/ac (30 acres/jug)	Apply at 20–50% bloom prior to disease development to control white mould. Under high disease pressure, make a second fungicide application with a different mode-of-action 7–14 days later.

Other application information

Packaging	One (1) case = 2 x 9.6 L jugs Acapela® is also available in a 115.2 L drum
Water Volumes	Ground: 110 L/ha = 10 gal/ac. Air: 50 L/ha = 4.5 gal/ac.
Aerial Application	Acapela® is registered for aerial application.

What growers are saying:

“We used Acapela® on our canola for the first time this year and it worked very well. Compared to areas not sprayed with Acapela®, we saw canola plants that were greener, flowered longer, healthier plants. There was pretty much 100% control of sclerotinia. We’ve used Proline® and Astound® in the past, and in comparison, Acapela® offers better usability and pricing. It mixed well and the packaging was easy to use. I will use it again next year and I’d recommend it to other canola growers.”

Dan Bonkowski, Grower, Wapella, SK
