SPEED, AGILITY AND EXCEPTIONAL COVERAGE

DuPont™
Acapela®
fungicide

Protect your cereal crops against disease.

Diseases in cereals can affect both yield and quality, so you need a fungicide you can rely on. Acapela® provides more complete coverage and protection against key diseases like rust, powdery mildew, septoria leaf blotch and tan spot.

With 4 movement properties, Acapela® is a one-of-a-kind fungicide that quickly and efficiently surrounds, penetrates and protects the leaf and stem.

This characteristic provides superior disease control for greener, healthier crops and higher yield potential.

Translaminar Movement

Moves through the leaf surface to protect top and bottom sides of the leaf.

Local Gas Activity

Gas-like protective barrier that moves locally over the leaf surface.

Xylem Systemic Activity

Movement through the plant tissues to distribute throughout the leaf.

Wax Diffusion

Provides more consistent coverage across the leaf or stem surface.

Rapid Absorption: Acapela® is also rapidly absorbed, putting these 4 unique movement properties to work fast, and allows you to spray when field conditions are challenging.

More moves, more bushels

Acapela® Field Performance - Wheat

Source: 2012-2015 DuPont Side-by-Side Trials

- Growers reported improved harvestability, standability and overall health.
- Over 60 trials in wheat and showed consistent performance from Acapela®
- Acapela is consistently outperforming key competitors.

What growers are saying:

"I will be spraying all my oats from now on with it. I won't be trying test strips, I'll just be doing it. The untreated was laying down flat and the treated was standing up. There was at least a 10 bushel difference. It's just an all-around good product. I'll be seeding 2000 acres next year and every acre is getting Acapela®."

"Acapela® worked very well. I'm very happy and pleased with the result. There was a 10 to 15 bushel increase over the control, and standability was excellent."

Aaron King, Choiceland, SK

Crops	Diseases	Rates	Application Information*
Wheat Barley Rye Oats Triticale	leaf rust, net blotch, powdery mildew, septoria leaf blotch, tan spot, scald, stripe rust	0.192 L per acre to 0.240 L per acre, or 40 to 50 acres per jug	Begin applications prior to disease development and continue on a 7 to 14-day interval. <u>Apply at T1 to T2 stage, ideally at the T2 stage or flag leaf.</u>

Other application information

Packaging	One (1) case = 2 x 9.6 L jugs Acapela® is also available in a 115.2 L drum
Water Volumes	Ground: 110 L/ha = 10 gal/ac. Air: 50 L/ha = 4.5 gal/ac.
Aerial Application	Acapela® is registered for aerial application.

*Do not make sequential applications of DuPont™ Acapela® fungicide or any other Group 11 fungicide before switching to a fungicide with a different mode-of-action.
