DUPONT™ TRAVALLAS™ IS REGISTERED FOR USE IN SPRING WHEAT, DURUM WHEAT AND SPRING BARLEY.

Research Update: Submission has been made to PMRA to add corn, soybeans and faba beans to the list of crops that may be seeded the following season.

A unique in-crop cereal herbicide that provides powerful control of your tough to control weeds.

Designed for powerful cereal protection:

- Provides control of key weeds like cleavers, dandelion, hemp-nettle, Canada thistle¹, kochia, wild buckwheat, and narrow-leaved hawk's-beard
- High performance on large weeds (ex: wild buckwheat 1 – 8 leaf stage)

Designed for ease of use:

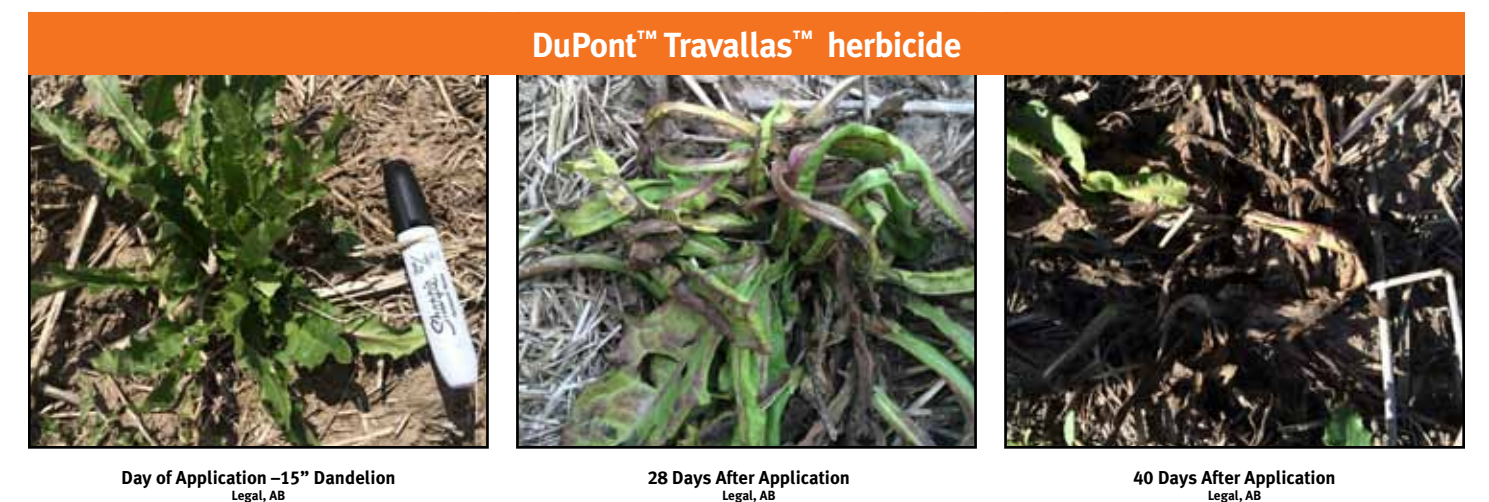

- Multiple modes of action built in (2 different groups, 3 active ingredients)
- Low use rate = like bulk in a jug
- Simple to use with a built in adjuvant

Designed for flexibility:

- Wide application window. Spray early or late and still get powerful control
- Multiple options for tank-mixing

Powerful control of key weeds like Dandelion:

¹Suppression.

DuPont™ Travallas™ herbicide is designed for powerful cereal broadleaf protection, all in a unique liquid form.

DuPont™
Travallas™
herbicide

Broadleaf control:
