

DuPont[™] Izon[®] Sleeve

DuPont Authentication

Key Product Advantages.

- **Product authentication integrated into your shrink sleeve**
Eliminate the cost and hassle of applying a separate authentication label onto your product. Izon[®] Sleeve provides all the security features embedded directly onto your existing shrink sleeve.
- **Tamper evidence**
When opened, both the shrink sleeve and Izon[®] Sleeve are designed to be destroyed, eliminating re-use.
- **Clearly visible, unique 3D features**
Make product authentication simple and intuitive for the entire value chain. DuPont proprietary 1,2,3,4 dot validation design (protected under copyright) makes it easy to verify full parallax 3D.
- **Bright holographic red security icon**
To enhance quick authentication, a clearly recognizable holographic red image is built into the label.
- **Deep Image**
This feature is extremely useful for field verification by the brand protection team and enforcement agents. Using a point light source (i.e. flashlight), a semi-covert image becomes visible “floating” in the background.
- **Disappearing Image**
This unique, highly secure feature is very easy to communicate to the entire value chain. When the label is viewed at an angle, the primary image completely disappears.

Patented DuPont technology defeats attempts to duplicate

The unique features of Izon[®] Sleeve are made possible only through DuPont photopolymer technology.

This enables you to have one of the most secure overt authentication devices available.

Optional Features

- **Transparent**
Transparent sleeves are a great option where product/package labeling space is limited. Allows application of Izon[®] Sleeve directly over printed text, bar codes, or other images.
